

CSL622

Name:

Entry Number:

Assume that all the students of CSL622 went on a trip to another similar world(Asgard) as Earth and wanted to do shopping there.

1. Which brand of phones among the following will you choose if you were to buy a mobile phone?
 - a)Mi
 - b)OnePlus
 - c)Apple
 - d)Samsung
2. Which type of shoes would you like to buy?(description about these are given in next page)
 - a)Running Shoes
 - b)Walking Shoes
 - c)Aerobic Shoes
 - d)Cross Trainers

After you are done with your shopping, you wanted to go back to your world but assume a series of events happened suddenly.

- You came to know that Asgard is being attacked by Hela(Thor's sister)
- She won the war and imprisoned everyone.
- Thor died:(
- There is no way that anyone can defeat her.

But assume that she likes you very much somehow and would like to send you back to your world along with any of 7 or less chosen friends of yours(You should choose) in a car and she also lets you keep the car yourself.

3. Which car will you choose?You should choose only one!
 - a)Maruthi Suzuki Ciaz
 - b)Honda city
 - c)Hyundai Verna
4. Whom will you take along in the car?(7 or less names)

Description of the shoes

1. Running Shoes

Joggers should wear a shoe with more cushioning impact. Running shoes are designed to provide maximum overall shock absorption for the foot. Although not a cure-all, these qualities in a running/sports shoe help prevent shin splints, tendinitis, heel pain, stress fractures and other overuse syndromes.

2. Walking Shoes

Walking shoes have more rigidity in the front so you can roll off your toes rather than bend through them as you do with running shoes. This will help reduce heel pain (plantar fasciitis and pump bumps) as well as burning and tenderness in the ball of the foot (metatarsalgia).

3. Aerobic Shoes

Shoes for aerobic conditioning are lightweight to prevent foot fatigue and have extra shock absorption in the sole beneath the ball of the foot (metatarsal area), where the most stress occurs.

4. Cross Trainers

Cross-training shoes, or cross trainers, combine several of the above features so that you can participate in more than one sport. A good cross trainer should have the flexibility in the forefoot you need for running combined with the lateral control necessary for aerobics or tennis.
